

POWERLINE COMMUNITY

MEETING

WHERE: Mindoro, WI at the Town of Farmington Hall

(N8309 Hwy 108 – next to the Cenex gas station)

WHAT: Information about the CapX2020 and Badger Coulee Powerline .

Hear about the other view – what the utilities don't tell you.

WHY ATTEND?

- Learn why this powerline is planned and how it will affect your property and our community.
- Find out who pays, who benefits, and who decides when we know our demand for energy use continues to decline.
- What are the health concerns for young people from this 345 kV powerline?
- Get information you need to protect our land and our treasure. We must show resistance and solidarity. This is one more way that money and land is being taken from the little guy.
- Meet with other concerned town residents and citizens from nearby communities who are asking tough questions about the CapX2020 and Badger Coulee ultra high voltage power line.
- Understand what you can do to keep the powerline from crossing our town and county.

THERE IS NO NEED FOR THIS POWERLINE - There are more economic, cost effective, safer and environmentally sound alternatives to ultra high voltage powerlines with 15-story steel towers. Locally produced and distributed renewable energy is the answer. Many other countries, states, cities and towns are beginning to generate and distribute their own electricity. This power line is about big corporation profits - bringing coal power from No. & So. Dakota to Eastern cities —all funded by rate-payers (that's us).

Get the facts – find out what you can do – work with your neighbors to determine our future.

For more information contact: Pete Van Laarhoven after 5 pm at [608.857.3553](tel:608.857.3553)

or josephmmorse@gmail.com.

Please share this information with other interested people – Thanks.
